

## Tiny Dancer—from Alone and Abused to Great Mom

*Every once in a while, a special animal in need comes into our lives. Such is the case for Dancer, a beautiful pregnant cat.*

Dancer hung around a neighborhood for well over a year being fed here and there when someone threw her scraps. She had litters of kittens before but no one knows how many or what happened to any of them. **No one claimed her and no one much cared what happened to her.** One of our adoption volunteers had friends in the neighborhood and asked about her one day. She saw a young man kicking the cat in the stomach—that was enough for her.

Dancer was incredibly pregnant at this point. She came to us at Cat Adoption Tails on Sunday and **gave birth to eight tiny babies** on Monday morning.

She has been the **best mom in the world.** She has the most amazing warm loving personality.

Two weeks after she had the babies, the stress overwhelmed her and **she quit eating.** We rushed her to the vet and could find no reason for her apparent distress.

But she **never quit taking care of her babies.** Even while we force fed her and gave her fluids for two weeks.

Dancer and her babies are doing well and the little ones are five weeks old now. **Every single one survived thanks to her incredible care.**

It will be at least two months before any of these precious babies are big enough to be adopted but **they are flourishing!!**

Please donate to **help us save animals like Dancer and her babies.**
